February 2026
Solved a beginner-friendly CTF web challenge and published a detailed technical writeup.

[Web MSN Revive]

Languages

Russian
Native

English
C1

First-year IT student passionate about InfoSec, CTFs, and backend development. Looking for an entry-level/intern position to grow in Application Security or Infrastructure. Fast learner with hands-on experience in basic web vulnerabilities, memory forensics, and Linux administration.

Skills

Security and CTF
Basic Web Exploitation (IDOR, Cookie manipulation), Memory Forensics (Volatility 3), OSINT.

Infrastructure & Linux
Debian/Ubuntu administration, Self-hosting, Proxy configurations (Hiddify, Xray).

Languages
Python (Intermediate), Go (Beginner), Bash

Tools
Burp Suite, Wireshark, Git, Docker (Basics).

Projects

Self-Hosted Home Lab & Infrastructure — Linux, Networking

- Architected and currently maintaining a remote headless Linux ecosystem.
- Deployed and managing a self-hosted private IRC chat and a remote NAS (serving as a privacy-focused cloud storage alternative).

HelloNN — Python, NumPy, Math

- Built a functional Neural Network pipeline relying entirely on NumPy to deeply understand ML mathematics, guided by Sentdex's "Neural Networks from Scratch" architecture.
- Manually implemented forward and backward propagation, activation functions (ReLU, Softmax), Categorical Cross-Entropy loss, and an Adam Optimizer.

https://github.com/Dfmari/HelloNN

Education

Kazan National Research Technical University (KNRTU-KAI)
Bachelor in Informatics and Computer Engineering (09.03.01)
Kazan • Expected Graduation: 2030

CTF

Tinkoff CTF (Starter League) — 2024
Top 100

Tinkoff CTF (Starter League) — 2025
Top 500

BelkaCTF #7 — 2025
33rd Overall / 10th among Students

Alfa Surfing CTF (CTF League) — 2025
81st

srdnlenCTF 2026 — 2026
149th
